BENEFITS

- Reduces fine lines & wrinkles
- Improves skin texture & tone
- Minimizes acne scars & sun damage
- Tightens skin & shrinks pores
- Delivers long-lasting rejuvenation

GERMAN-ENGINEERED LASER ARM

*renowned for its
exceptional quality,
precision, and reliability.*

Unlike traditional lasers, the fractional CO₂ laser treats only a fraction of the skin at a time, creating microscopic channels that accelerate recovery while maximizing results. It's ideal for clients seeking dramatic improvement without the extended downtime of older resurfacing methods.

MEDICAL LEVEL DEVICE

- Precise targeting of benign lesions without damaging surrounding skin
- Quick in-office procedure with minimal discomfort
- Low risk of scarring and fast healing (typically 7-10 days)
- Ideal for cosmetic concerns—no stitches, no fuss
- Safe for most skin types and customizable to your needs

WHAT CAN BE TREATED

- **Skin Tags:** Small, soft growths often found on the neck, underarms, or eyelids
- **Moles:** Raised or flat pigmented spots (must be cleared as benign before treatment)
- **Cherry Angiomas:** Bright red vascular lesions that increase with age

Whether it's a bothersome mole, a skin tag that catches on clothing, or a cherry angioma that's become more noticeable with age, our CO₂ laser technology delivers pinpoint accuracy and smooth results with minimal downtime.
